

## What Makes a Bathroom Stand Out?

February 17, 2020

Bathrooms are essential and yes, they are the most used rooms in any house. So why don't we make it a space that has a little more style – something that makes you smile each time you enter? Regardless of the size of your bathroom, design upgrades can be made within any budget.

Here are a few things to consider when looking to make your bathroom special:

1. Pairing a **unique tub** or a **large frameless glass shower** with beautiful tiles will set the style for the room. Perhaps it's a combination of tile sizes that all coordinate or maybe a single feature tile that really pops, tiles easily become the focal point when entering the room. Colors, styles and sizes are almost limitless.
2. A **vanity** is certainly a design element but it is also critical for storage. Bathrooms are an essential space that we use every day but also the smallest room in the home so incorporating the proper vanity and storage features will help declutter while also bringing style to the bathroom.
3. **Mirrors** can prove that your space is absolutely the fairest of them all. Mirrors can cover a recessed medicine cabinet or be wall mounted. Beyond their obvious use, mirrors also help to disburse light in the room but they can also be backlit or incorporate makeup lighting. They can be framed to match the cabinetry, framed with a different material or be frameless.
4. **Plumbing fixtures, lighting** and **hardware** all combine to set the tone of the bathroom. Contemporary designs, modern finishes, traditional curves, transitional lines – whatever you select, these items should be curated to coordinate with the other elements in the bathroom so the finished space tells a story.

Visit your local remodeler's showroom to see some of the possibilities to transform your bathroom.
